3rdRail™

The Fastest Way to Develop Ruby on Rails Web Applications

EMBARCADERO TECHNOLOGIES.

Feature Area	Feature	3rdRail™	TurboRuby™
Application Runtime	Ruby VM	>>	>>
	Rails 1.2 and Rails 2.1	>>	
	MySQL, SQLite	>>	>>
	InterBase Developer Edition	>>	>>
	Mongrel	>>	>>
Consoles	Ruby Console	>>	>>
	Rails Console	>>	
	Hyperlinking of all navigable artifact paths and traces	>>	>>
	Coloring of output based on embedded ANSI Color Escape Codes	>>	>>
Code Editor	Ruby code completion	>>	>>
	Rails code completion including dynamically generated methods	>>	
	Rename Controller refactoring	>>	>>
	Ruby source code formatting	>>	>>
	Rename View refactoring	>>	>>
	Rename Action refactoring	>>	>>
	Ruby Find Declaration	>>	>>
	Ruby Find References	>>	>>
	Quick Outline	>>	>>
	In-place RDOC in code editors	>>	>>
	Ruby code editing including RJS and RXML	>>	>>
	RHTML Code Completion	>>	>>
	RHTML/HTML code editing	>>	>>
	CSS editor	>>	>>
	YAML editor	>>	>>
	SQL editor	>>	>>
	XML, DTD and XML Schema editors	>>	>>
	JavaScript code editing	>>	>>
	Context-aware code templates	>>	>>
	Type Inference including support for Ruby and Rails API patterns	>>	Ruby Only
Problem Detection and Correction	Project Configuration	>>	>>
	Ruby API Deprecation and Removal	>>	>>
	References to missing Gems and Rails Plugins	>>	
	References to missing Rails Items	>>	
IDE Productivity	JavaScript debugging	>>	>>
	DOM inspector	>>	>>
	Ruby Code Optimizer	>>	>>
	Visual Test Runner for one-click run, debug, or profiling of individual or collection of tests / specifications using Test::Unit, RSpec, and/or Shoulda	>>	>>
	Embedded Mozilla perspective	>>	>>
	Request Monitor including XML HTTP	>>	>>
	Mylyn Task Management and UI Filtering	>>	>>
	Regular Expression View including templates and live evaluation against editor content	>>	>>
	Log Watcher View	>>	>>
	Import existing Ruby and Ruby on Rails projects	>>	Ruby Only
	Quick Open Resource	>>	>>
	Quick Open Type	>>	>>
	Type Hierarchy view	>>	>>
	Navigate To, walk Rails call processing path	>>	

3rdRail™

The Fastest Way to Develop Ruby on Rails Web Applications

EMBARCADERO TECHNOLOGIES.

Feature Area	Feature	3rdRail™	TurboRuby™
	Call Hierarchy view	>>	>>
	Script Explorer view	>>	>>
	RDOC preview pane	>>	>>
	Rails project explorer	>>	
	Database explorer	>>	>>
	New Rails project wizard	>>	
	New Rails controller wizard	>>	
	New Rails model wizard	>>	
	New Rails form partial for model wizard	>>	
	Embedded Ruby console (IRB) with code completion	>>	>>
	Embedded Rails console with code completion	>>	
	XPath View including live evaluation against editor content	>>	>>
	Rails Perspective including Rails Explorer view	>>	
	Automatic build path configuration based on Rails Project conventions	>>	
Debugger	Fully integrated with IDE	>>	>>
	Support for both Ruby and Rails	>>	Ruby Only
	Support for ERB debugging (Embedded Ruby, RHTML)	>>	>>
	Detailed formatters for Ruby and Rails specific data structures	>>	Ruby Only
	Support for stepping, run to breakpoint, and smart step	>>	>>
	Variable introspection	>>	>>
	Hot swap	>>	>>
	Remote debugging	>>	>>
Commanders	Command and Parameter completion	>>	>>
	Hyperlinking of all navigable artifact paths and traces	>>	>>
	Coloring of Input, Output, and Error content	>>	>>
	Project & Workspace Commander	>>	>>
	Coloring of output based on embedded ANSI Color Escape Codes	>>	>>
Dependencies View	Resolution Project, Ruby, and Rails Dependencies	>>	Ruby Only
	Filtering based on Inbound, Outbound, or both directions	>>	>>
	Filtering based on exact selection or selection and its containers	>>	>>
	End-to-end navigation in both directions	>>	>>
	Filtering based on dependency type	>>	>>
Server Management	Automatic Rails server configuration	>>	
	Quick launch on Rails server	>>	
	Running / debugging web pages embedded in Mozilla	>>	
Team Development	CVS integration	>>	>>
	Subversion integration	>>	>>
	Bugzilla integration	>>	>>
	Jira integration	>>	>>
	XPlanner integration	>>	>>
Platforms	Microsoft® Windows Vista™	>>	>>
	Microsoft® Windows XP	>>	>>
	Mac OS® X 10.5	>>	>>
	Ubuntu Linux 8.04	>>	>>
