

## **Moonsoft Oy Achieves ISO 27001:2022 Certification**

Helsinki, Finland – February 12, 2026 – Moonsoft Oy is pleased to announce that it has achieved certification in accordance with the ISO/IEC 27001:2022 standard, the internationally recognized framework for information security management systems (ISMS).

The ISO 27001:2022 certification demonstrates Moonsoft Oy's commitment to maintaining the highest standards of information security, data protection, and risk management. The certification confirms that the company has implemented a comprehensive and systematic approach to managing sensitive information, ensuring its confidentiality, integrity, and availability.

Achieving this certification reflects Moonsoft Oy's ongoing dedication to strengthening its internal processes, continuously improving its security controls, and meeting both regulatory requirements and customer expectations in an evolving digital landscape.

By aligning its operations with the ISO 27001:2022 standard, Moonsoft Oy further reinforces its position as a trusted and responsible partner for clients and stakeholders throughout Finland.
